

RV battery connected to inverter

Overview

To use your RV battery, connect the RV power cord to the inverter and turn off the converter. Make sure the converter is off to prevent charging the battery from itself. This guide simplifies the technical process while highlighting critical safety measures – think of it as your roadmap. When your RV is plugged into shore power, you're bringing a source of 120V AC electricity into your RV to power those appliances and devices, just as if you were at home. But the battery bank in your RV provides 12V DC power. What is an RV inverter?
