R Beginner: how do you calculate the ratio between two columns

A ratio is just division. So let's say you have a data frame called "d" with two columns "a" and "b", then you could get the ratio a/b as follows: `d <- d %>% mutate (r = a/b)` That should a new ...

Calculating ratio in R

One thing, you don't need as.double or the .0 in 0.0. For example, identical(0, as.double(0.0)) returns TRUE. It looks like you are coming from a different language. In base R there ...

How to Calculate Ratios in R (With Examples)

In R, ratios can be easily calculated with the help of the divide operator (/). To

calculate a ratio, divide one number by another number, and the result will be the ratio in a decimal form. For ...

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

ENERGY STORAGE SYSTEM

Ratio and Regression Estimators in R

This document introduces the use of the survey package for R for estimating ratios as well as using ratio and regression estimators. It also demonstrates the relationship between ratios and domain ...
