

# Recommended sources of rechargeable energy storage batteries in Bosnia and Herzegovina

## Overview

---

Batteries such as lead-acid, sodium-sulfur, and nickel-cadmium can be applicable for price arbitrage and bulk storage, besides other applications, as in distributed storage, mobile applications, and besides having shorter calendar life as compared to pumped hydro storage systems. Bosnia and Herzegovina is set to have its first battery energy storage systems installed in the transmission network, which will provide auxiliary services. The BESS will be designed to integrate additional intermittent renewable energy sources, such as wind and solar power, thereby. Lithium ion battery long term storage Bosnia and He ium deposit , magnesium and other minerals that are in demand in Europ te with Li-ion batteries in a shift towar yclod if they are to be used in bulk energy storage systems. news at last week"s Energy Storage Summit CEE, its Poland country manager Przemek Zielinski. ium (\$463k), Poland (\$331k), and Czechia (\$316k).
