

Residential roof with photovoltaic panels

Overview

Typically, solar panels perform best on south-facing roofs with a slope between 15 and 40 degrees, though other roofs may be suitable too. You should also consider the age of your roof and how long until it will need replacement. If there are trees near your home that create excessive shade on your roof, rooftop panels may not be the most ideal option. The size, shape, and slope of your. Solar, or photovoltaic (PV) panels as they're referred to in NFPA 1, Fire Code, are becoming more and more common on one- and two-family dwelling and townhouse roofs. Since the 2016 edition of NFPA 1, access pathways have been required on roofs to facilitate fire service access as well as egress. These are small solar panels that can be integrated directly into the roof, creating a more discreet and aesthetically pleasing solar system.
