

Romanian home energy storage goes offline

Overview

On 21 November 2024, the Romanian government approved a new Government Emergency Ordinance (GEO 134/2024) promoting the elimination of double charging and stimulating the development of energy storage technologies to ensure the transition to a low-carbon economy by amending. On 21 November 2024, the Romanian government approved a new Government Emergency Ordinance (GEO 134/2024) promoting the elimination of double charging and stimulating the development of energy storage technologies to ensure the transition to a low-carbon economy by amending. Romania could see an unprecedented surge in the photovoltaic sector in 2025, boosted by funding programs such as Casa Verde and RePower EU, the liberalization of energy prices, and the general increased interest of Romanians in getting rid of the worry about bills and becoming energy independent. From 2025 to 2030, the country plans to add no less than 4GW (AC) of new energy storage installations, with storage capacity expected to. The National Energy Regulatory Authority of Romania has approved a regulation eliminating double taxation of energy storage, to allow for faster deployment of solutions for storing electricity.
