Overview

Some rural Alpine regions do not have reliable and sufficient energy supply; as a result, they are exposed to blackouts. ALPGRIDS promoted local and sustainable energy production through microgrids in the Alpine region. 41), BML / Christopher Fuchs (p. CyberGrid provides a cloud-based platform designed for decentralized grids that effectively integrates renewable energy and storage. Their focus on efficient resource use and flexibility solutions positions them as a key player in addressing Europe's energy challenges through innovative technology. Community microgrids for rural sustainability deliver localized, renewable energy solutions, enhancing resilience and reducing reliance on fossil fuels. Over 800 million people lack reliable. Intelligent charging infrastructure, CO2 reduction and a secured supply of electricity Get in touch! Intelligent system optimizing electricity and heating demand with PV generation, e-charging infrastructure, battery storage and a microgrid controller.

ALPGRIDS: local grids for reliable renewable energy in the Alps

Comprising seven pilot projects in Austria, France, Germany, Italy and Slovenia, the ALPGRIDS project aims to increase uptake of renewable energy sources (RES) in Alpine regions.
