

# Saudi Arabia Solar Air Conditioning

## Overview

---

The Saudi Arabia solar-powered central air conditioning (AC) market presents a compelling strategic opportunity driven by the nation's ambitious renewable energy targets, escalating demand for energy-efficient cooling solutions, and a favorable regulatory environment. Increasing electricity costs in Saudi Arabia are pushing consumers and businesses to adopt. Saudi Arabia Solar Air Conditioning Market Segmentation and Scope Analysis Product segmentation reveals a shift towards integrated, hybrid solar air conditioning systems combining photovoltaic and thermal technologies, driven by increasing efficiency demands and decreasing component costs, with a. With rising temperatures in Saudi Arabia and a heavy reliance on traditional air conditioning systems, the need for sustainable and efficient cooling solutions has become a necessity. Saudi solar air conditioners are an ideal choice for the future, offering an innovative environmental and. AFIFI Group was founded in 1982 by Eng Ali Salim, it all started when he launched the first company AFIFI AIR CONDITIONING which is a leading HVAC EPC contractor in the Kingdom of Saudi Arabian. A decade later in 1992 AFIFI Metal Works (ASMETAL) was founded as a leading decorative metal works. Given that the climate of Saudi Arabia is very hot most of the year, every Saudi home needs an air conditioner to cool the air temperature, as temperatures in the summer reach 45 degrees Celsius, so we can guess the big expenses that are spent on air conditioning alone. Of that, 72% is used for Heat Ventilation and Air conditioning system (HVAC). The peak demand is projected to reach 120 GW by the year 2032 and the Kingdom may face the risk to.
