

# Schools use ultra-large capacity smart photovoltaic energy storage cabinet

## Overview

---

The NSW Government program is the largest of its kind in Australia with around 7,488 solar panels and 4,605 kilowatt hours of battery energy storage capacity being installed at 79 public schools. Schools will also take part in a Virtual Power Plant (VPP). Thanks to the unique advantages such as long life cycles, high power density, minimal environmental impact, and high power quality such as fast response and voltage stability, the flywheel/kinetic energy storage. But the. Around 1,500 NSW public schools across the state have already installed 17 megawatts of solar energy systems. These systems are capable of generating enough energy to power 3,000 NSW homes, saving almost 17,000 tonnes of carbon emissions each year. But energy systems are rapidly transforming. 100% renewable energy; 25% local, interconnected within the distribution grid and ensuring resilience without dependence on the transmission grid; and 75% remote, fully. energy-efficient schools can play a big role in easing the dilemma faced by every school district in America: fulfilling ever-increasing educational needs in the face of tight budgets. Equipped with a robust 15kW hybrid inverter and 35kWh rack-mounted lithium-ion batteries, the system is seamlessly housed in an IP55-rated cabinet for enhanced protection.
