

# Senegal s first solar-powered communication cabinet inverter

## Overview

---

The ASER300 project in Senegal uses mini-grid systems from Asantys Systems and Off-Grid Europe with SMA's Sunny Island battery inverters. Drought, arid and saline soil, lack of rainfall, forest dieback - Senegal is feeling the full impact of climate. The BSLBATT PowerNest LV35 hybrid solar energy system is a versatile solution tailored for diverse energy storage applications. Equipped with a robust 15kW hybrid inverter and 35kWh Submit your inquiry about hybrid electric systems, solar panels, solar cells, inverters, and energy storage. The government's ASER300 project is bringing electricity to 300 villages all around the country with mini-grids, which include PV modules, inverters, batteries, and cooling systems. Designed to stabilize power supply across Senegal's capital region, this lithium-ion battery solution addresses frequent blackouts while supporting The Dakar Cabinet. Modern home installations now feature integrated systems with 10-30kWh capacity at costs below \$700/kWh for complete residential energy solutions. Technological advancements are dramatically improving home solar storage and inverter performance while reducing costs.
