

Service period of wind power tower

Overview

There are several factors that affect how long a wind turbine lasts, including design, maintenance, location and technological advancements. On average, the expected service life of a wind turbine is approximately 25 years, but this doesn't mean that each component is meant to. The Wind Energy End-of-Service Guide is intended to give a foundational understanding about what happens to wind turbines and related infrastructure when a wind energy project is repowered or decommissioned. As of October 2022, over 70,000 land-based wind turbines with a combined capacity of nearly. Published 22 Aug 2024 (updated 17 Nov 2025) · 3 min read The lifespan of a wind turbine is not set in stone, as it can be extended or shortened, depending on a number of factors. The timeframe isn't fixed though. Many wind farm assets are capable of safe life extension well beyond the original design life if they're well-sited, diligently maintained and sensibly upgraded. Department of Energy's Office of Energy Efficiency and Renewable Energy (EERE) and the International Renewable Energy Agency (IRENA). With proper maintenance and advanced blade monitoring. Wind turbines have an average service life of around 25 years, but not every component is designed to last for 25 years. A good quality, modern wind turbine will.

Service period of wind power tower

How Long Do Wind Turbines Last?

Wind turbines are built to last 20 to -25 years, but with the right maintenance, repowering or life extension strategies, landowners can often benefit from them for much longer.
