Photovoltaic (PV) technologies – more commonly known as solar panels – generate power using devices that absorb energy from sunlight and convert it into electrical energy through semiconducting materials. These devices, known as solar cells, are then connected to form larger power-generating units. Primoris Renewable Energy (PRE) is focused on providing self-perform EPC services to the energy sector with a strong focus on solar photovoltaics, energy storage, and other renewable energy technologies. Primoris Renewable Energy is a leading power generation EPC (Engineering, Procurement. As one of leading solar panel suppliers in China, the Sunrise module solar products currently mainly include the development, production installation, and sales of sunrise pv modules, as well as the construction management, technology development and operation, and maintenance of photovoltaic power.
