

# Solar Photovoltaic Waterproofing

## Overview

---

Meta Description: Discover why waterproofing photovoltaic panel gaps matters, how to do it safely, and industry-approved methods. You know, solar panels are built to withstand rain, right?

. Exclusive distributor of Soprasolar® and Flagosolar® solutions, SOLARDIS was created in 2008 and is a 100% subsidiary of the SOPREMA group. Backed by the hundred-year experience of its parent company, SOLARDIS already has, in France, Spain, Italy, Switzerland, etc. Preventing Electrical Failures Water ingress can lead to electrical short circuits, reducing the efficiency of the solar panels and potentially causing system failures. Avoiding Corrosion. STOP THE WATER, CATCH THE SUN is the mission that distinguishes General Solar's General Solar PV system. General Solar PV is an integrated flexible photovoltaic waterproof system (BIPV - Building Integrated Photovoltaic) certified according to the technical standards CEI EN 61646 and CEI EN 61730. Among the "Five Points of New Architecture" formulated by Le Corbusier, terrace gardens figure as a way to take advantage of a building's so-called fifth facade, either as leisure areas or landscaping spaces. For manufacturers, installers, and end-users, it represents a reliable power solution that can withstand harsh environments—whether it's coastal salt spray, heavy rain, or long-term outdoor exposure.
