

Solar battery open container base station

Overview

It integrates solar PV, battery storage, backup diesel, and telecom power distribution in one standard container. Strong storage: Up to 50 kWh capacity, perfect. Highjoule's HJ-SG Series Solar Container was built for one purpose: keeping base stations running where there's no grid power. Green energy input: Supports solar, wind. To cope with the problem of no or difficult grid access for base stations, and in line with the policy trend of energy saving and emission reduction, Huijue Group has launched an innovative base station energy solution. Among the most scalable and innovative solutions are containerized solar battery storage units, which integrate power generation, storage, and management into a single, ready-to-deploy. MOBIPOWER containers are purpose-built for projects where energy demands go beyond what a trailer can deliver.
