

Solar energy storage projects under construction in Georgia

Overview

Georgia Power has embarked on an ambitious initiative to enhance the state's energy infrastructure by commencing the construction of 765 megawatts (MW) of new battery energy storage systems (BESS) across four counties in Georgia. Also included are two other storage projects from Leeward Renewable Energy and EDP Renewables. Their total planned capacity is 3,989 MW. The company-owned project, located next to the existing Twiggs County Solar facility, was approved for construction by the Georgia Public Service. Georgia's solar and storage market has taken off in recent years, landing it a top spot in SEIA's national solar rankings. During the 2024 session, an industry-supported decommissioning bill was passed after much collaboration and effort. Community solar is the next big piece of the puzzle that.
