

# Solar panels generate electricity instead of the grid

**LPW48V100H**  
**48.0V or 51.2V**

## Overview

---

Going off the grid means your home produces and stores all its electrical power, often from renewable energy sources such as solar and sometimes a wind turbine. Instead of being dependent on your local utility company, you're your own electricity provider. Trust me, number 8 will blow your mind! Let's dive in and power up your independence! 1. Here's how the system operates: The dream of energy independence is. There are two main types of solar energy technologies—photovoltaics (PV) and concentrating solar-thermal power (CSP). Professor of Engineering, Pennsylvania State University.
