

# Solar power generation does not match the publicity

## Overview

---

In a new monthly column for pv magazine, the International Solar Energy Society (ISES) debunks old and new urban legends about solar energy. Here we set the record straight about some plausible. Solar does not require fuel but the construction cost is very high - about ten times more than a natural gas plant for the same amount of electricity. The high cost is masked by government. Solar power is already providing the "cheapest electricity in history" and is expected to play a pivotal role in the global transition away from fossil fuels. The technology accounted for two-thirds of the world's new electricity capacity and two-fifths of new generation in 2024, according to the. A new analysis of social media posts finds that public support for solar energy remains high, though that support declined significantly from 2016 to 2022. Solar Panels Don't Work When It's Cloudy No one likes a sunless, cloudy day. We thought its better since its NEM 2.
