

Solar power generation in World War II

Overview

And even in the real history, World War 2 did have an effect on solar PV because it accelerated rocket technology and eventual satellite development, where PV was valuable regardless of price. A small benefit at a horrendous cost in life. By the 1920s, her star had risen further and she moved to the US to work as a biophysicist. Duct tape, canned food, Freeze drying. A Hungarian born American scientist, Mária Telkes (1900-1995), was called "The Sun Queen" and among other honors, was postmously inducted into the National Inventors Hall of Fame. For example, installing PV arrays on all DoD land could meet the electrical energy requirement of the United. Spurred by WWII, U. According to historian Arthur Herman, this rapid expansion resulted from a U. energy policy that set unifying goals and worked with industry experts to achieve them. Onan completely lost control of his plans for orderly growth. During the next five years, Onan was manufacturing as many as 70,000 generator sets.
