

Solar power satellite factory in Sydney

 **TAX FREE**    

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

ENERGY STORAGE SYSTEM

Overview

Having tested its solar cell technology with spaceflights on Australian and international missions, Extraterrestrial Power is gearing up to manufacture solar cells for customers worldwide - and maybe one day build them in-situ on the Moon. While solar cells have powered satellites for decades, they're not quite the money-saving solution we're used to on Earth - but an Australian company is aiming to change that. Sydney-based Extraterrestrial Power has developed a mass-manufacturable solar cell that it estimates to be ten times more. Extraterrestrial Power has developed a space-grade solar cell thin enough to be mass produced like terrestrial solar cells, and which it estimates to be ten times more affordable than current space solar cells. Each of these current renewable options have limitations, in particular intermittency. Leading companies and research organizations worldwide are advancing this technology, aiming.

Solar power satellite factory in Sydney

Home , Extraterrestrial Power Ltd.

Extraterrestrial Power's mission is to deliver mass manufacturable, radiation tolerant, thin silicon solar cells for 10x cheaper than current space solar sells.
