

# Special structural adhesive for photovoltaic bracket clamps

## Overview

---

Solar special sealant for photovoltaic modules is a single component neutral curing silicone rubber. The product has good adhesion to aluminum, tempered glass, composite backing material, junction box PPO material, and can be used for bonding and sealing of solar cell component. Silicone elastic interior wall coating is a high-grade coating with silicone polymer as film-forming substance, prepared by a special process. after curing, it forms a flexible elastic film on the surface, so that our materials have a wide range of unique properties and applications. Molecular. Crestabond structural adhesives have been developed to provide market leading strength for installing solar panels to roof structures, eliminating the need for mechanical fixings, savings costs and improving water tightness. Supplied globally, Crestabond primerless MMA. From solar panel adhesives and bonding compounds to electrical component encapsulation materials, Epic Resins is a leading supplier of resins formulated to withstand the intense environmental conditions common to solar energy system components. One critical aspect of ensuring the stability and longevity of these installations is selecting the right adhesive for solar panel brackets.
