

# Specification drawing of photovoltaic panel drilling on roof

## Overview

---

Provide an architectural drawing and riser diagram for the homeowner showing the planned location for future photovoltaic and solar hot water system components. DWG format available upon request. The Renewable Energy Ready Home (RERH) specifications were developed by the U. Plans must be clear and legible; non-legible plans will not be accepted. Many photovoltaic cells are wired together by the manufacturer to produce a solar module.

## Solar Photovoltaic: SPECIFICATION, CHECKLIST AND GUIDE

About the Renewable Energy Ready Home Specifications Assumptions of the RERH Solar Photovoltaic Specification Builder and Specification Limitations

- 1.5 Document the solar resource potential at the designated array location
- 3.3 Install a conduit for the AC wire run from the designated inverter location to the electric service panel
- 4.2 Record the name and Web address of the electric utility service provider
- 5.1 Landscape Plan
- 5.2 Placement of non-

array roof penetrations and structural building elements  
Appendix A: RERH Labeling Guidance  
These specifications were created with certain assumptions about the house and the proposed solar energy system. They are designed for builders constructing single family homes with pitched roofs, which offer adequate access to the attic after construction. It is assumed that aluminum framed photovoltaic (PV) panels mounted on a "post" and rail mou
