

State Grid Micro Wish Content

Overview

This framework provides relevant background information for State Energy Offices and PUC consideration, regardless of their state's microgrid landscape, through examples from peers as states across the country have implemented varying strategies to enable microgrids. Microgrids have a unique role in transforming the electric grid. The nation simultaneously faces increasing threats from extreme weather events and opportunities to electrify entire sectors of the economy and address ongoing inequities in energy access. Microgrids, which can. The Think Microgrid 2024 State Scorecard uses an evaluation framework that considers five fundamental criteria, each of which is critical to understanding today's market and future opportunities: deployment, policy reform, resilience, market development and equity. Add us as a Google Preferred Source to see more of our articles in your search results. In the scorecard, most states were awarded a grade of C or D. Only four states - Connecticut, Colorado, Hawaii and Texas - earned. The scorecard, based on Wood Mackenzie microgrid project and market data, shows that all but four states fall short of a 'B' grade.
