

# State solar energy ecological power generation

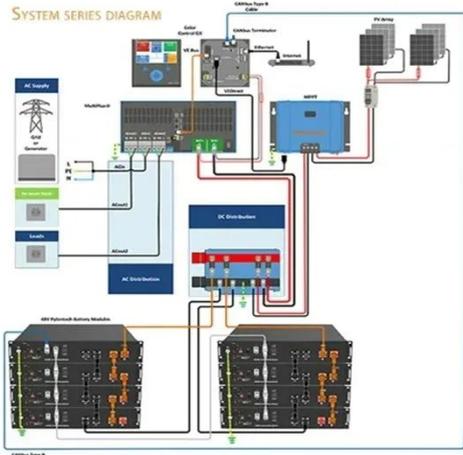

## Overview

---

State Solar Carve-Out Programs - Learn about which states have solar renewable energy certificate (SREC) markets and how they may influence your project. California once again takes first place among the top states generating electricity from solar power this month. 4% of the United States' total of 24,519 thousand megawatt-hours, according to ChooseEnergy.com's February 2026 solar energy generation report. 18 trillion kilowatt-hours of total electricity at utility-scale power generation facilities, with renewable energy sources contributing roughly 21% of this total and solar power making up 3. It is important to understand the policy landscape early in your development process. In our latest Short-Term Energy Outlook (STEO), we expect U.

## State solar energy ecological power generation

### Solar Capacity by State 2026

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.
