### Revolutionary idea to store green power for the grid

Bricks Instead of Water Customers and Investors Missing Link in The Power Chain Great Expectations The solution proposed by the Ticino start-up is an electricity storage battery consisting of blocks of concrete that weigh 35 tonnes each and a six-arm crane with a novel design. These "bricks" are stacked one

on top of the other in the shape of a tower, like pieces of Lego, to store up power when there is surplus production of electricity from wind. See more on swissinfo
