

# Taiwanese media marvel at solar power plants

## Overview

---

Taiwan's solar power industry is forging ahead amid an ambitious drive to help reshape the nation's topsy-turvy energy landscape, but the journey remains fraught with physical constraints, industrial demand, and questionable societal issues. TAIPEI (Taiwan News) — Legislation passed by the Kuomintang and Taiwan People's Party on Nov. 14 has significantly tightened environmental impact assessment requirements for solar power projects, prompting contractors to warn that investment has nearly come to a standstill. The new EIA process — in. Amid weak government communication and a lack of transparency, renewable energy has become yet another partisan battleground in Taiwan. Taiwan's transition from coal and gas to renewable energy, mostly solar and wind, is crucial for the country to reach its legally enshrined 2050 target for. Taiwan's go-slow energy transition At lunchtime on the second day of the Year of the Dragon (Feb. 11), Taiwan posted a clean-energy record. This milestone became public knowledge a few hours later, when Taiwan Power Co (Taipower) announced that, at 12:21pm, photovoltaic solar arrays and wind. Expansive grid hardware at the Changhua Coastal Industrial Park outside Taichung, Taiwan, and the massive coal-fired generator behind it help sustain the island state's energy-gobbling microchip-fabrication plants. Speaking to the press, Huang reiterated his stance, stating the probe should "fix wherever problems.
