

Tcl solar inverter lights up red

Overview

If your inverter is showing a red light, start with a Power Cycle: Turn off the AC disconnect circuit breaker supplying power to the inverter. Seeing a red light on your solar inverter can be a little alarming—but it's not always a sign of something serious. It signifies a fault or warning condition encountered by the inverter, 2. This could relate to input voltage variations, 3. Since the inverter is a crucial part for converting DC power from either a tubular battery or. If it red and not orange, then you may want to call your utility. If orange (amber), then it could be a communication issue, but your micros would still be pumping AC. It could be related to varying weather conditions, seasonal changes, or actual system faults like electrical issues, software glitches, or component malfunctions. Any combination of LEDs on.
