

# Tesla solar power generation test

## Overview

---

On July 29, a 700MW fleet of household battery systems, including Tesla Powerwalls, was tested as a virtual power plant (VPP) in California, discharging 535MW into GO15 member CAISO's grid during the 7pm-9pm peak. The Tesla app provides you with a seamless experience to monitor your solar system's performance and historical production over a given time period. Instead of one big power station, it's thousands of little ones, all coordinated by software. The event took place on 29 July. Tesla and Sunrun, a solar and storage leasing company, were the two biggest. Tesla Solar offers solar panels, solar batteries, and solar roofs, providing homeowners comprehensive system design and full project management from initial consultation through installation. Our in-depth review covers Tesla solar products, services, pricing, and customer reviews. In 2025, the company deployed about 46.7 GWh of energy storage, with the energy segment generating roughly 12.8 billion dollars in revenue and.
