

# Thailand s new energy storage ratio

## Overview

---

These are set to make up 51 percent of the country's total electricity production, up from 36 percent which was called for in the 2018 PDP. The 2024 PDP draft provided a more detailed breakdown of how Thailand will reach this goal. Solar is the most affordable new source of power 3. Pumped hydro can also support higher renewables uptake 3. Retrofitting thermal power plants for hydrogen and ammonia 3. Low-carbon. Looming growth from PDP2024 with SMR and 52% RE • 300MW SMR in 2037, 52% RE on 24. 4GW wind, and 300MW WTE • New 77. 5GW capacity during 2024-37 on 54. 5MW peak demand • Prefer IPPs RATCH and GULF on their visibly strong capacity growths Revisit PDP 2024 on SMR, RE, and BESS We. Thailand intends to source nearly 35,000 MW of new electricity from renewables as it looks to reach carbon neutrality and net zero commitments. However, the deployment of Battery Energy Storage Systems across the country remains limited. There are plans to increase storage capacity, but it may not. Singapore, - Scaling up renewables would be the most economic pathway for Thailand to make progress toward its climate-related goals, according to BloombergNEF's latest report, Thailand: Turning Point for a Net-Zero Power Grid, published today.

## Thailand's new energy storage ratio

### Thailand's New Energy Storage Revolution: Innovations Powering a

This tropical paradise isn't just about pad thai and full moon parties anymore - it's becoming Southeast Asia's new energy storage powerhouse. With renewable energy integration ...
