

# The difference between photovoltaic panels and power generation glass

## Overview

---

In this guide, we explain the differences between mono-glass and glass-glass (bifacial) panels. You'll see how they stack up for safety, weight, weather, and more. When discussing renewable energy and modern construction, two terms often surface: photovoltaic power generation and glass. Discover which solution aligns with your sustainability goals. But they solve different problems: one relates to durability. Glass-glass PV modules refer to photovoltaic panels in which the solar cells are encapsulated between two layers of glass, both on the front and the back. Make an informed choice before you buy. Solar power is booming in 2025.

## The difference between photovoltaic panels and power generation

### Why Dual-Glass Is Not the Same as Bifacial: A Guide to Structural

An explanation of the structural differences between dual-glass and bifacial solar modules, the mechanism behind rear-side power generation, and suitable application scenarios, ...

12.8V6Ah

- Nominal voltage (V):12.8
- Nominal capacity (ah):6
- Rated energy (WH):76.8
- Maximum charging voltage (V):14.6
- Maximum charging current (a):6
- Floating charge voltage (V):13.6-13.8
- Maximum continuous discharge current (a):10
- Maximum peak discharge current @10 seconds (a):20
- Maximum load power (W):100
- Discharge cut-off voltage (V):10.8
- Charging temperature (°C):-20-+50
- Discharge temperature (°C):-20-+60
- Working humidity: <95% R.H (non condensing)
- Number of cycles (25 °C, 0.5C, 100%doD): >2000
- Cell combination mode: 32700-4s1p
- Terminal specification: T2 (6.3mm)
- Protection grade: IP65
- Overall dimension (mm):50\*70\*107mm
- Reference weight (kg):0.7
- Certification: un38.3/msds

### What is the difference between solar photovoltaic modules and electric

Solar panel is application for outdoor enviroment such as rooftop, solar power station and so on. But electric glass is more suitable for building, like building walls and windows etc.
