

The fastest time to install solar power

Overview

Fall installations typically have a faster turnaround time than spring and summer, as fewer homeowners invest in solar during this season. While spring is still slower than summer, fall is the slowest season of the three, resulting in the lowest wait times and the fastest turnover. The first and most obvious element seasonality will play in your solar installation is wait times. As a result, you may wait several weeks before your solar. While solar power delivers long-term benefits no matter when it's installed, the best time of year to make the switch may be earlier than you think. Here's why: The work conditions improve because of moderate temperatures, allowing installers to maintain higher efficiency in their operations.
