

The protagonist helps the village to generate solar power

Overview

In 'The Boy Who Harnessed the Wind', the protagonist William Kamkwamba demonstrates how sunlight can be used to produce energy through the use of solar cells. In this inspiring true story, she helps bring clean, renewable energy to remote communities in Indonesia through micro-hydro generators. No longer dependent on harmful fossil fuels, villagers begin to thrive with safer homes, better schools, and more time to learn and grow. While large cities debate clean energy policies and power companies race to adopt green technologies, this village. From the hills of Manipur to the farms of Maharashtra and the orchards of Dahanu, solar energy is not just a utility—it's becoming a lifeline. While metros chase sustainability in glossy high-rises, real impact is unfolding in India's villages, where people are using the sun to reclaim control over. In his signature style, Allan Drummond tells the story of the largest solar plant in the world, the Noor Solar Power Plant in Morocco's Sahara Desert, in *Solar Story*—by relating it to the everyday life of a schoolgirl in a small village next to the plant. Our mission is to create a future that is sustainable, equitable, and healthier for all. More than 65% of India's population resides in rural areas, where access to.
