Overview

Tokyo Century will invest in four wholly-owned extra high-voltage grid-scale battery storage projects totaling 101MW/386.3MWh, the company announced on Decem. The assets are expected to be commissioned gradually between FY2028 and FY2030. As with the 1st project announced on Septem(a “2MW output / 8MWh storage capacity” scale BESS station project in Kushima City, Miyazaki Prefecture; hereinafter referred to as “the 1st Project”), the Company signed a construction contract for the Project on Decemwith Green. Tokyo Century currently holds stakes in two operational grid-scale BESS assets. The assets are expected to be. It is Japan's first fund exclusively for energy storage that invests in, develop and operate new energy storage plants, including those equipped with renewable energy facilities, in the Kanto region and elsewhere in a one-stop manner. Did You Know?

Tokyo With 37 million residents and 98% dependency on imported energy, Tokyo faces unprecedented challenges in energy security.

Tokyo energy storage power station project

Initial Acquisition for Japan's First Energy Storage Fund

The project is located in Kasama City, Ibaraki Prefecture. The Kasama project will have a capacity of 20 MW / 80 MWh and benefit from the Tokyo Government's subsidy scheme.
