

Uninterruptible Power Supply f04

Overview

If the battery in the Back-UPS has not been correctly connected to the UPS, when turning on the Back-UPS, the unit may display an F02 or F04 error code on the display. I was hoping I could save a few bucks and just replace the battery but want to know if that would be a waste of money?

When I remove the battery and run the UPS it works fine as a. This video showing you how to solved the problem, if you can not solved this problem, you can contact me for that. you can easily come out from this problem. Getting Tripped with F04 error code. I am Electrical Engineer and Electronic Hobbyist Message Board, 2024/12/06, APC UPS Pro1000 FO4 Error, My Aforsaid UPS Is switching on but getting F04 error. For testing purpose I used 24Volts 10A .
