

United states solar incentives

Overview

Although the federal 30 % solar tax credit for customer-owned systems expired at the end of 2025, there are still ways for homeowners to capture significant savings through state rebates, tax incentives, and net metering programs—especially if you design and procure your system. Although the federal 30 % solar tax credit for customer-owned systems expired at the end of 2025, there are still ways for homeowners to capture significant savings through state rebates, tax incentives, and net metering programs—especially if you design and procure your system. DSIRE has teamed-up with EnergySage to help you go solar. By joining EnergySage, you will be able to receive: DSIRE is the most comprehensive source of information on incentives and policies that support renewables and energy efficiency in the United States. Established in 1995, DSIRE is operated. If you invest in renewable energy for your home such as solar, wind, geothermal, fuel cells or battery storage technology, you may qualify for an annual residential clean energy tax credit. Any system installed after this year won't qualify for the discount that's helped millions of households cut thousands off their installation costs.
