

# Utility-scale energy storage cyprus

## Overview

---

Cyprus is set to build its first large-scale electricity storage system within the next 16 months, according to Energy Minister George Papanastasiou. This move is key to supporting renewable energy sources like solar power, which currently face challenges due to the lack of storage. The Electricity Authority of Cyprus has issued a tender titled “033/2025 EPC Contract for Utility Scale Battery Energy Storage System (BESS)” aimed at advancing energy storage capabilities within the hydrogen industry. Published on Ma, this tender invites submissions until April 3. The Apollon PV Park has commissioned a 3.3 MWh BESS as part of the Apollon PV Park. In this comprehensive guide, we at CGP Solar explain why BESS is becoming essential for businesses in Cyprus, how it works, who needs it. The government of Cyprus has published guidelines for a scheme to support the deployment of approximately 150MW/350MWh of energy storage. The Ministry of Energy, Trade and Industry for the Mediterranean island state in southern Europe published its guide (7 February) for the scheme after the. By June 2026 at the latest, the distributed energy storage system with a total capacity of 120 MW, which is currently being implemented, will be operational and will function with full transparency on the basis of the 'Policy for Management and Participation in the Competitive Electricity Market.
