

# Water channel photovoltaic flexible support

**LPSB48V400H**  
**48V or 51.2V**

## Overview

---

The flexible photovoltaic support adopts the process of "hanging, pulling, hanging, supporting and pressing", and the installation span can reach 10-30 meters, effectively avoiding unfavorable factors such as mountain undulations and high vegetation, and transforming the land. The flexible photovoltaic support adopts the process of "hanging, pulling, hanging, supporting and pressing", and the installation span can reach 10-30 meters, effectively avoiding unfavorable factors such as mountain undulations and high vegetation, and transforming the land. SkyCan is Sentnet Engineering's innovative solar solution specifically designed for water channels and irrigation canals. Our modular steel support system can be easily installed over channels ranging from 2 to 10 meters in width, providing a dual benefit of clean energy generation and significant. The PV Waterproof Rail is made of high quality ZAM275 material with the performance of high load-bearing, wind resistance, ensure the safety of solar panels. And the PV Waterproof Rail secure the solar panels and hold them strongly and waterproof, Besides, the PV Waterproof Rail have many holes in. The flexible photovoltaic support originates from the roof of suspension structure and glass curtain wall. The suspension structure consists of a series of tensioned cables as the main load-bearing components. It has the advantages of large span, fast construction speed, and can adapt to complex environments.

## Water channel photovoltaic flexible support

---

### A review on conceptual design of support structures for floating solar

This paper reviews the conceptual design of support structures for floating solar power plants. The advantages of floating photovoltaic (PV) power plants are discussed, including the cooling effect of ...
