

What are the energy storage systems of Sinoma Energy Conservation

Overview

Their core products include advanced energy management systems and waste heat recovery technologies, which are distinguished by their cutting-edge design and effectiveness. Sinoma Energy Conservation Ltd. provides various products and services in the field of energy conservation and environmental protection in China and internationally. The company offers energy-saving and environmental protection engineering and equipment; building energy-saving materials; and is. As the third largest energy-consuming industry after metallurgy and chemical industry, it accounts for about 7% of the total energy consumption in China, while the energy consumption of cement enterprises reaches 75% of the energy consumption of building materials industry. Under the situation of. China's Sinoma EC International has signed an agreement to construct a 300 MW solar power plant in Uzbekistan's Navoi region, marking a significant step in the country's push for renewable energy development. The electro-chemical battery storage project uses lithium-ion.
