

What is a car-grade solar battery cabinet

Overview

A solar battery cabinet is a protective enclosure designed to house batteries that store energy generated from solar panels. Most industrial off-grid solar power systems, such as those used in the oil & gas patch and in traffic control systems, use a battery or multiple batteries that need a place to live, sheltered from the elements and kept dry and secure. It protects them from bad weather and temperature changes. These cabinets not only have special gaskets against dust and liquids but also locking mechanisms to secure your enclosure against unauthorized access. Most of our enclosures are designed to NEMA3R and rated for outdoor. Whether you require a standalone battery enclosure or shelving for an equipment shelter, outdoor battery cabinet or trailer enclosure, ICS Industries have a standard range available for immediate purchase, as well as custom designed equipment racks and battery shelves tailored to suit your specific.
