

What is oxide in chemistry

What is oxide in chemistry

What are the 2 elements of copper oxide?

What elements make up copper 2 oxide? Copper (II) oxide is composed of two elements: copper and oxygen. Its chemical formula is CuO , indicating the ratio of copper to oxygen atoms in the ...

Is calcium oxide an acid or base?

Calcium oxide is a strong base that neutralizes the strong acid, hydrochloric

acid, to produce a salt and water. Calcium ethanoate is formed when ethanoic acid reacts with calcium oxide.
