

# What is solar power generation equipment

## Overview

---

A solar generator is a portable system that captures energy from sunlight using photovoltaic (PV) panels and stores it in a battery for later use. These systems are typically used as alternative or backup power sources in off-grid settings, emergency situations, and outdoor activities. But what is a solar generator exactly?

And how does it compare with typical fossil-fuel-powered. What is a solar generator, you might ask?

Simply put, a solar generator is like your everyday electric generator, but instead of using fuel or gas, it harnesses the abundant power of the sun. This blog explores the various types of solar energy.
