

# What kind of glue is good for photovoltaic panels

## Overview

---

The most suitable adhesives for solar panels include silicone-based, epoxy, polyurethane, and acrylic adhesives. To enhance the efficiency and longevity of solar photovoltaic panels, a specific type of adhesive is essential. Clear polymer-based glue ensuring transparency, 3. Compared to the Weldbond Multi-Surface Adhesive, which is larger and costs a bit more, the all-purpose version offers the same high-quality bonding in a more convenient size. After testing dozens of options, I found that the right adhesive isn't just about sticking; it's about durability, waterproofing, and ease of removal when needed. Many companies use them because they work well.
