### Quick Answer: What Should You Clean Solar Panels With?

The Short Answer: For most homeowners, the best solar panel cleaning solution is simply plain water (preferably distilled or deionized) combined with a soft-bristle brush or microfiber cloth. This guide shows you how to clean solar panels safely and effectively—backed by expert tips and the latest best practices for DIY and professional options. Rinse the residue off the panels with your hose. While natural rainfall helps rinse away some dirt and debris, relying solely on it may not be enough—especially if you live in certain environments.
