

Which companies can build microgrids

Overview

Leading microgrid companies such as ABB Ltd., GE, Siemens, Eaton, Schneider Electric, Engie Solutions, and Cummins are at the forefront of this evolution, delivering innovative microgrid energy solutions and expert consulting services. A microgrid is a small-scale, localized energy system that can operate independently or together with the traditional utility grid. It typically combines renewable energy sources (like solar panels), energy storage systems (like lithium batteries), smart inverters, and advanced control software. Respire Energy is developing the next-generation metal-air battery packs for behind-the-meter, microgrid, and utility-scale energy storage. Using abundant materials, our solution is safer and lower-cost than existing lithium-ion and lead-acid batteries, accelerating the clean energy transition. The cost to set up a microgrid ranges from a few hundred dollars for small projects to millions for large microgrids to serve factories, campuses, or entire communities. 20 Frameworks, Startup Intelligence & More! This article provides an analytical overview. Discover which organizations are pioneering the future of sustainable, decentralized energy. This overview spotlights the top 36 microgrid companies making waves through rapid innovation, as explored in the Microgrid Market by Technology, Power Source, Component, Power Rating, Ownership Model. AutoGrid is a cleantech company that specializes in optimizing microgrid operations through its AutoGrid Flex™ software platform.

Which companies can build microgrids

Top Companies in Microgrid (Jan, 2026)

There are 146 Microgrid startups which include Bboxx, CleanSpark, ConnectDER, Scale Microgrids, VoltaGrid. Out of these, 71 startup s are funded, with 44 having secured Series A+ ...
