

Who patented the solar bracket

Overview

Klockner & Co has been granted a patent for a structural bracket designed for solar mounting systems. The mounting bracket can include a body, a top panel, and side panels. The Search specific patents by importing a CSV or list of patent publication or application numbers. The bracket features an L-shaped configuration with a first planar portion, a second angularly positioned portion, a mounting tab, and a hook that securely locks the bracket to a mating beam using. Brackets for photovoltaic ("PV") modules are described. In one embodiment, a saddle bracket has a mounting surface to support one or more PV modules over a tube, a gusset coupled to the mounting surface, and a mounting feature coupled to the gusset to couple to the tube.
