

Who should I ask to replace a broken photovoltaic panel in a rural area

Overview

If you suspect solar panel damage, the first thing to do is contact the installation company or another qualified solar energy system repair outfit. The technician can accurately evaluate the type of damage and the extent of the problem. Luckily, we've identified the top five most common residential solar panel repairs and the roles you, your warranty, and your solar installer will play in getting them fixed. Broken or etched glass is often repairable by a trained technician. However, the task must take place off-site, which means you or the professional will have to remove. Still, you should know the reasons why they break, how to help prevent breakages, and what to do if it happens. In this article, we go in-depth on the subject.
