

Will I be struck by lightning if I install photovoltaic panels

Overview

The chance of a homeowner's property getting struck by lightning is unaffected by the installation of solar panels. Your solar panels will be safer from lightning with the proper protection systems, which could cause injury or damage. Repairs are costly and may need full replacements. In this article, you will learn how to protect your solar power. The short answer is: it depends on your location, system size, and local lightning activity—but most systems benefit from some level of protection.

Will I be struck by lightning if I install photovoltaic panels

Do solar panels make it more likely a house is hit by lightning

According to the Office of Energy Efficiency and Renewable Energy, 95% of solar panels sold are made of silicon, something Panovich said doesn't attract lightning. "There really isn't
