

# Wind-gathering tower wind power generation

## Overview

---

The wind-gathering tower type wind power generation system changes a mode that a common small-sized wind driven generator is lifted up to the air by using a long upright rod, so that the system can greatly save the land consumption and is better in stability, security and. The wind-gathering tower type wind power generation system changes a mode that a common small-sized wind driven generator is lifted up to the air by using a long upright rod, so that the system can greatly save the land consumption and is better in stability, security and. The invention discloses a wind-gathering tower type wind power generation system which is provided with a wind-gathering tower with a vertical cylindrical surface. The wind-gathering tower can lift a series of small-sized wind driven generators to an appropriate height; and due to the appearance of. What's left is the biggest and most important job—choosing and installing the tower. The mounting structure for a photovoltaic (PV) array puts the solar energy collectors up in the fuel—sunshine. allows the Wind Tower to be the ultimate compact power generator. for generating electricity in urban areas. 5 feet of a "Mid" section would be embedded in concrete, resulting in 27 feet to the top of the mounting tube. This tower. A wind-collecting tower power generation, funnel-type technology, which is applied in wind power generation, wind turbines for storing power, and configuration of installation/support of wind turbines, etc.

## Wind-gathering tower wind power generation

---

### Funnel type wind gathering tower power generation system

The invention relates to a funnel type wind gathering tower power generation system which comprises a wind gathering tower body. The wind gathering tower body comprises an all-dimensional wind ...
