

Wind power for electricity generation

Overview

Wind power is the use of energy to generate useful work. Historically, wind power was used by, and, but today it is mostly used to generate . This article deals only with wind power for electricity generation. Today, wind power is generated almost completely using, generally grouped into and connected to the .

Wind power for electricity generation

Electricity generation from wind

Wind flows over the blades creating lift (similar to the effect on airplane wings), which causes the blades to turn. The blades are connected to a drive shaft that turns an electric generator, ...
