

# Wind turbine blade manufacturing plant address

## Overview

---

For a recent Apex-constructed project in Iowa, the turbine blades were built in El Paso, Texas; the steel towers came from facilities in Iowa, South Dakota, and Oklahoma; and the nacelle came from GE's manufacturing facility in Pensacola, Florida. In 2023, Vestas announced it would manufacture the V163-4.5 MW turbine, bringing new investment and jobs to Colorado. Vestas wind turbines are part of a thriving energy. TPI has manufactured over 100,000 wind blades since 2001 with an excellent field performance record in a market where reliability is critical to our customer's success. With over 40 years of innovation that continues to shape the wind industry, LM Wind Power is a pioneer in advancing wind turbine blade technology and setting new standards for sustainability, efficiency, and digital industrialization. They provide advanced drone inspections and repair services for wind turbine blades. The goals are to increase reliability while lowering production costs and promote an industry that can meet all demands domestically while competing in the global market.

## Wind turbine blade manufacturing plant address

### Wind turbine manufacturing and service , Vestas US

Vestas employs more than 5,000 people in the manufacturing, installation, and service of onshore and offshore wind turbines. Our North American market is served from our offices in Portland, OR, ...
