

Young man made his own solar generator

Overview

Watch as a young innovator transforms an iron pot and mirrors into a powerful solar generator! Witness the amazing journey as he enhances his design by salvaging a phototransistor from an old TV for improved efficiency. In the final test, see the generator in action as it powers a fan, water pump. Portable, weatherproof, and ready-to-rock — a homemade solar generator can meet all your power needs in and around your boat, camper, or cabin. Do you have what it takes to make one yourself?

My family owns a cozy off-grid cabin in the hills, but since there's no electricity, I'd only stay there. A young Nigerian man who was fed up with the electricity condition in his neighbourhood decided to seek another source of electricity. The man (@geepeezeemanii) said that it was pretty expensive when he searched for a solar generator online, so he got more info on how to build his own. People were. iable source of electricity on the go. Inspired by the innovative engineering behind the James Webb Telescope, this feature explores how everyday materials and advanced techniques can transform sunlight into a reliable energy source.
